Notes:

- We've been told by our suppliers that LP no longer makes 3/4" x 4" x 16' Smartside composite trim. An alternate product, MiraTEC trim, is shown in the above list. Builders' FirstSource (<https://www.bldr.com/>) with 500 locations US-wide is an option.
- Find better prices on screws by buying the Deck Plus brand from MaxWarehouse.com or ACEHardware.com in 25 lb. buckets. Headlok screws are also available in 250-count buckets from Amazon. Buy in bulk whenever possible.
- Shingles are needed when setting up on site: 3 bundles of SKU 775-940 GAF NS Weathered Wood & 1 bundle of SKU 214-628 WTHRD Gray Sovereign
- Solid Concrete Blocks are needed when assembling the shed on site. 4 needed – 8" x 4" x 16"
